

Run Bug

by Roberto Perez-Franco '04

"Scavenging habits of graduate students: dynamics of survival on stolen pizza slices"

That's too cheesy. What else you got?

"Hoarding patterns of nerds in Mass Ave's crossing: an algorithm of chaos triggered by flashing red lights"

Nope. Next?

"Spectrography of the hair dyes of freshmen: a taxonomic approach to the most common 150 colors"

Dude, you're in trouble.

Mr. Buddy, when will you tell me your thesis topic?

Working on it in right now, Professor!
(Gulp...)
